GitHub : https://github.com/kariemSeiam

Objective :

To obtain a challenging role as an Android Developer that allows me to utilize my technical skills, creativity, and passion for developing high-quality native applications.

Education :

Bachelor's Degree in Computer Science and Mathematics, Zagazig University (Expected graduation: 2024)

Professional Experience:

- ❖ **The Chance Company** (Training) (February 2023 - April 2023)
  Currently undergoing training in various aspects of Android development, including **UI/UX** design, **Kotlin** programming language, and **algorithms**.
  Collaborating with a team on a UI/UX project to enhance user experience.

- ❖ **Noon Company** (Fulfillment Associate) (October 2021 - November 2022) Assisted with supply chain and e-commerce systems, including WMS and Noon Express.
  Gained experience in fulfillment and inventory management.

- ❖ **Freelance Android Developer** (February 2020 - December 2021)
  Developed native Android applications using Java and Android Studio.

Certifications and Courses :

- ❖ **InnovEgypt** Certificate: Completed a 45-hour training course and developed a final project for a potential startup (September 2021)

- ❖ **Instant Company** Android Course (Java Native) (120h): Completed a 120-hour Android development course with Instant Company (October 2019 - February 2020)

- ❖ **Udemy Courses**: Completed various short courses on Java, Kotlin, Android, and business development through Udemy.

Projects:

- ❖ **IMEI Activation**: This is an application that allows users to access production and activation dates for devices. It features a database for tracking usage and an admin panel for managing user accounts. This project is fully completed.
- ❖ **Scriptor**: This is a writing platform for poems, short stories, quotes, and more. It has an admin panel for moderating user-submitted content, registration and login functionality, and a feedback and reporting system.
- ❖ **Number Base Converter** This is a simple app that allows users to convert numbers between binary, octal, decimal, and hexadecimal bases.
- ❖ **Image Scraper Plugin** This is a tool that allows you to scrape images from any website, preview them, and easily download or copy them for personal use.
- ❖ In addition to these projects, I have also worked on UI/UX screens and other projects code that are not yet finished. You can find more details about my work on my **Github profile**.

Skills :

- ❖ **Java**, **Kotlin**, **Android Studio**, **RESTful API**, **and UI/UX design , MVVM ,Git** .
- ❖ Passionate with **test-driven development (TDD)** and **clean code principles**.
- ❖ Good **analytical** and **problem-solving** skills.
- ❖ Excellent teamwork and communication skills.
- ❖ Passionate about staying up-to-date with the latest advancements in **technology** and **artificial intelligence.**
